Bed Assembly Instructions

	Single Bed	King Single Bed	Double Bed	Queen Bed
1 x Bedhead	✓	✓	✓	✓
1 x Footend	✓	✓	✓	✓
2 x Side Rails	✓	✓	✓	✓
1 x Centre Rail	x	x	✓	✓
Bed Slats	11 Slats	12 Slats	11 Slats	12 Slats
Grub Screws	8	8	12	12
4 x Self Tapping Screws	✓	✓	✓	✓
1 x Allan Key	✓	✓	✓	✓

- 1) Attach the two (2) side rails to the bed head using two (2) grub screws per bracket.
- 2) Attach the footend to the side rails using two (2) grub screws per bracket.
- 3) Insert the centre rail, attach to the bedhead and footend using two (2) grub screws per bracket. (Skip if assembling single or king single bed.)
- 4) Insert the slats into the grooves in the side rails and using a cordless drill, drill the centre slats through to the rails using the four (4) 45 mm screws. This will prevent any bowing of the side rails that may occur over time.
- 5) Once the bed is assembled, tighten the grub screws in each bracket.

Note: If the bed is to be moved once assembled, ensure two people do so with the load taken at the head and foot of the bed to prevent any warping which may place stress on the brackets. If the bed is moved and brackets do snap from head or foot as a result of one person moving the bed, no responsibility will be taken by the manufacturer.
